Experience

LTM (formerly LTIMindtree) **Nov 2025 – Present**

Quality Engineer

- Developed a scalable hybrid automation framework for the Beaverbrooks UK E-commerce website using Java, Selenium, TestNG, POM, and BDD (Cucumber).
- Automated critical end-to-end business scenarios including navigation, product listing, product listing, product listing, and checkout workflows.
- Built reusable automation utilities for reporting, logging, WebDriver management, and data-driven testing.
- Worked on cross-browser automation, synchronization handling, debugging, and error management.

Shripal Metals **Dec 2024 – Mar 2025**

Jr.Programmer Intern

- Develop and maintain the company's website, ensuring all requirements are met.
- Coordinate with the project manager to align on project goals and timelines.
- Address and resolve any queries, ensuring client needs are satisfied throughout the development process.

IBM **June 2023 – July 2023**

Frontend Developer Intern

- Focused on enhancing proficiency in software development.
- Worked in an environment that promoted teamwork and cooperation.
- Participate in daily stand-up calls for sharing updates.
- Built a website called Travelo, a user-friendly web application designed to offer travelers a convenient way to explore destinations, find the best deals and easily plan their dream vacations.

Projects

Paras Security Systems - Company Website | *HTML/CSS/JS, Node.js, Express.js, MongoDB, Google Sheets*

- Developed a company website to support the transition from an offline business model to hybrid online-offline platform.
- Implemented secure authentication, user management, inventory management, role-based access, multilingual support, analytics, and smart search.
- Integrated email notifications, best-selling product recommendations, and an admin panel while strengthening digital presence and CRM processes.

JanAushadhi - A Generic Solution for Better Health | *HTML/CSS/JS, Django, Python*

- Helps users find cost-effective generic medicine alternatives.
- Provides personalized suggestions based on medicine details.
- Offers easy search, location, and language translation features.
- Regularly updated with accurate generic medicine information.

Ananya Drishti - An Application For Blind People | *Java, Kotlin*

- Developed an Android app using Kotlin with OCR to convert text to audio for visually impaired users.
- Integrated customizable text-to-speech features (voice, speed, pitch, volume) for enhanced accessibility.
- Added features like a calculator, weather updates, GPS, and battery monitoring.

Events Euphoria - An Event Management Website | *HTML/CSS/JS, Node.js, Express.js, NeDB*

- Created an event management web app with registration, scheduling, and global accessibility via Google Translator API.
- Integrated social media, email campaigns, and analytics for effective promotion.
- Built with Node.js, Express.js, NeDB, HTML/CSS, JavaScript, and Bootstrap for scalability and usability.
